

Stevan Lukic

FOUNDER-ENGINEER | AI PRODUCT DEPLOYMENT

CEng MICE | Singapore (Permanent Resident) | stevan@civils.ai | stevanlukic.com

PROFESSIONAL SUMMARY

Founder-engineer with 12 years of technical delivery and 4 of it deploying AI systems into production for enterprise and government customers. Built Civils.ai from zero to \$1M ARR and 16,000 monthly active users, personally writing the early product (Python, JavaScript, React) that combines proprietary computer vision models with OpenAI LLMs. I own the complete delivery loop hands-on: customer discovery, technical scoping, system design, prototyping, build, rollout and adoption, feeding field learnings directly back into the product using lean startup principles. Chartered civil engineer with deep built-environment domain expertise and an established track record with Singapore government agencies.

CORE SKILLS

AI / LLM: Production deployment of OpenAI LLMs and proprietary computer vision models, LLM-powered document processing, translating model behaviour into product experience.

Software: Python, JavaScript, React, Django, FastAPI, MySQL, full-stack architecture, cloud application development.

Customer delivery: Enterprise discovery and scoping, pilot-to-production rollouts, six-figure contract negotiation, government and enterprise stakeholder management.

PROFESSIONAL EXPERIENCE

Founder & CEO — Civils.ai Singapore Jan 2022 - Present

- Built and deployed an AI platform that automates construction quantity takeoff, combining proprietary computer vision models with OpenAI LLMs to help contractors estimate costs more accurately.
- Grew the product to \$1M ARR, 16,000 monthly active users, 200 paying B2B customers and 5 enterprise deployments; raised \$1.3M USD in venture funding.
- Scaled a Singapore Government (JTC) engagement from a \$10K pilot to a \$200K production deployment across 12 divisions, with 528 man-hours saved during the pilot phase alone.
- Closed six-figure enterprise contracts including with Singapore government agencies JTC and BCA, owning discovery, scoping, security review and rollout end-to-end.
- Wrote and reviewed production code across the full stack while acting as CPO, embedding in client-facing meetings and converting field feedback directly into shipped features.

Civil Engineer — ARUP 2020 - 2022

- Managed the design of construction projects valued at over \$100 million.
- As an ARUP digital champion, helped develop cloud applications that reached 15,000 users.

Civil Engineer / Project Engineer — Morgan Sindall 2014 - 2020

- Designed landmark infrastructure projects including Crossrail and Thames Tideway; promoted to Project Engineer managing projects valued up to \$50 million.
- Two years managing and supervising site teams on live construction sites.

TEACHING & CREDENTIALS

Adjunct Lecturer — BCA Academy, AI in Construction

Chartered Civil Engineer (CEng MICE) — Institution of Civil Engineers

EDUCATION

MEng Civil Engineering — University of Warwick 2009 - 2014
